The semi- and freestanding double-walled acrylic tubs with an oval inner shape are finished in glossy white acrylic, 5 mm. The overflow opening (slot) has no overflow cover, this is white acrylic. The adjustable feet and a chrome-plated POP-UP +drain are already fitted on delivery, the siphon is supplied separately in a box.

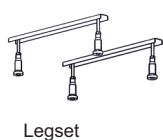

Acrylic trays are made of high-quality 5 mm acrylic, are reinforced through and through and colored white. The acrylic trays are UV-resistant. The material is completely non-porous, Limescale hardly sticks, so no bacteria remain. The acrylic bathtubs are easy to clean. The surface is pleasantly warm. The double-walled acrylic bathtubs include feet, siphon and overflow set as standard.
